

EXCLUSIVE FOR END USERS

# UNIWORX® PLUS SET-OFFERS

Universal corner radius and high-feed milling cutter with maximum variability for both roughing and finishing

Each of the eight sets comprises a **UNIWORX® PLUS** milling cutter body with twenty cutting inserts. The milling cutter is especially suitable for use as a corner radius and high-feed tool for roughing and finishing with steel workpieces. Each of the exclusive sets also contains a specially designed **POKOLM** coffee mug.

**Benefits of the UNIWORX® Plus milling cutter body at a glance:**

One milling cutter body can be fitted with cutting inserts with two different geometries for use as a corner radius or high-feed milling cutter

- ⊕ Low procurement costs as a single cutting material grade is suitable for practically all high-feed applications and all materials
- ⊕ Torus inserts with a small true corner radius can be used to provide an alternative to solid carbide end mills for certain applications
- ⊕ High-feed cutting inserts enable exceptional feed rates and thus maximum removal speeds
- ⊕ Perfectly designed coolant channels for absolute process reliability
